Instructions

Please find following folders within the folder that contains this Read Me file.

1. First Folder is Flex_Printing
   - You must carry this complete folder in any storage device to the vendor who prints the flex sheet.
   - This folder has a file with extension .cdr (Corel Draw file- X5 version) which opens in Corel draw X5 or higher version. This Corel Draw version would be available with the vendor printing the flex.
   - Dimension of the arena is already specified in .cdr file and your vendor will understand the dimension from the file. For your reference and verification, the printed flex sheet will be of dimension **245 cm x 200 cm**.
   - Ask the vendor to make sure that colours such as black are **perfect black** and do not contain shades. Vendor can make changes in colour accordingly to get best from his/her printer.
   - Team is **not allowed** to make any change in the Corel Draw file. Any team making such manipulations will be disqualified from the competition.

2. Second Folder is Arena_Design_Image
   - This folder is for your reference. It contains a pdf version of the arena. You can have complete view of arena by viewing this file.
   - You can open this file in any pdf reader.
   - When you go to vendor for printing the flex sheet, carry a print out of this pdf file. When your vendor opens the .cdr file in their system check that it looks similar to one in the pdf printout.
   - Dimensions of arena are not mentioned in pdf version.

General Instructions for keeping flex sheet in good condition:
1. Leave sheet open for about 30 minutes to dry in air after printing. After this, you can roll it and bring it home.
2. DO NOT fold the flex sheet. Always keep it rolled after using it.
3. You will be using the printed flex sheet throughout the competition, so teams are advised to store the rolled up flex sheet in a dry, safe place.
